

IVAR[®]

(Intelligent Video Analytics Recorder) Version 1.11

All-in-One VMS & IVA

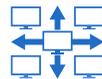

Gorilla Technology Group
www.gorilla-technology.com

All-in-One VMS & IVA Solution

- Comprehensive yet compact Video Management System with Intelligent Video Analytics.
- Ideal for clients who prefer to take all-in-one and proactive video surveillance.

Flexible & Scalable with Client Needs

- Scalable and flexible use from all-in-one machines or gateway hubs to large server scenarios.
- Well defined deployment to small shops, large sites or multiple site scenarios.

Adding Value with API Integration

- Open architecture and API interface for quick integration with existing VMS solutions (e.g., Milestone XProtect®) and other platforms (e.g., IoT, Access Control, Building Automation System – BAS, Kiosk) which ensures minimal migration efforts for clients and System Integrators.

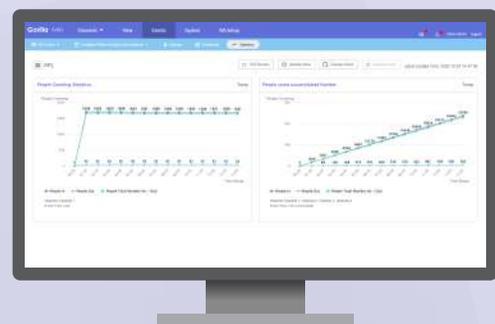

Intel® Optimized for Cost & Performance

- Fully optimized by the OpenVINO™ toolkit to run faster and give a better cost structure when compared to CPU/GPU-based hardware.
- Versatility that can run on CPU-only systems, NO GPU needed.

Make Proactive Choices Based on Actionable Insights, Not Guesswork

- Create Profiles and Dashboard Cards to View Event Data
- Gain Comprehensive and In-depth Statistical Charts that Visualize Video Data
- Gives You Actionable Insights to Enhance Operations
- Demographic, People Counting, & Vehicle Counting Dashboards and Statistics Available

IVAR® Analytic Capabilities

Face Recognition

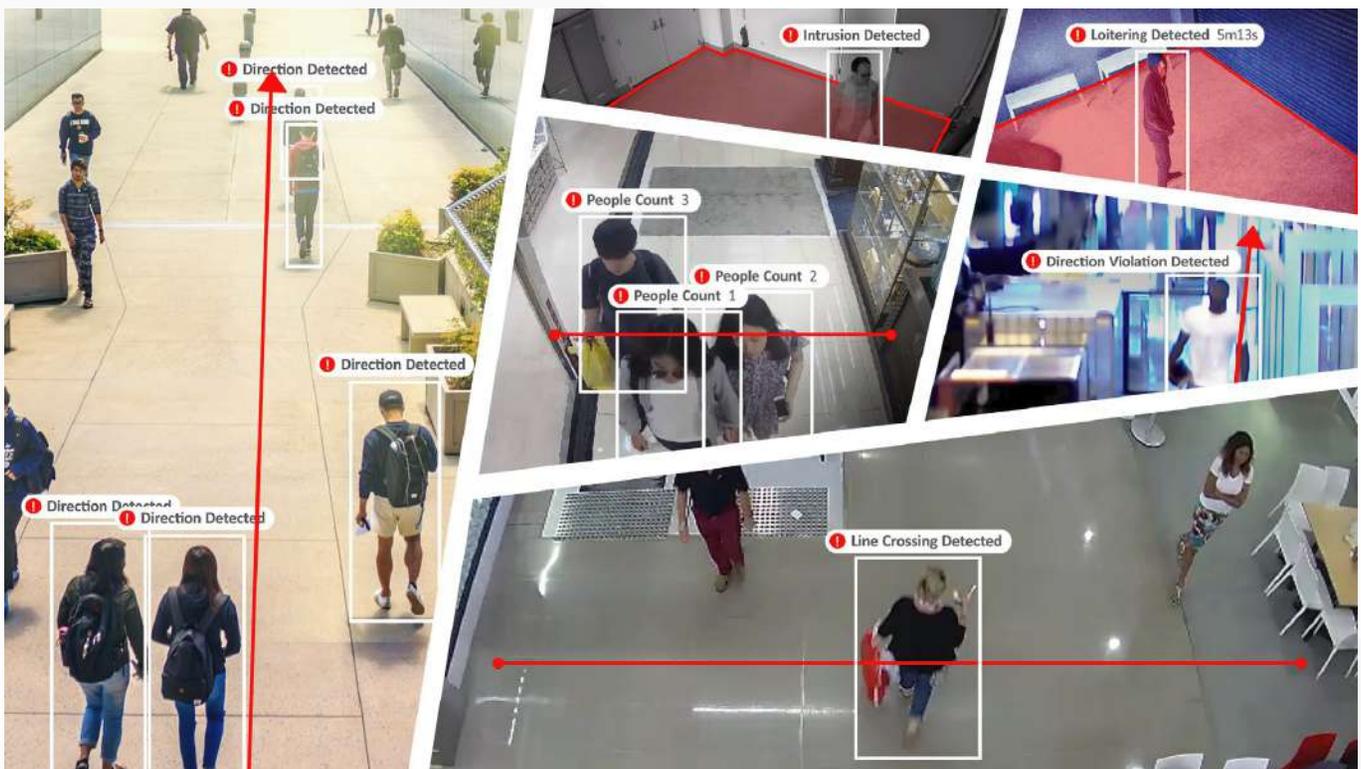

- VIP, Watchlist, Blocklist
(Requires BAP companion module)

Human Detection

- Clothing Colors
- Faces
- Head & Shoulders

Face Detection

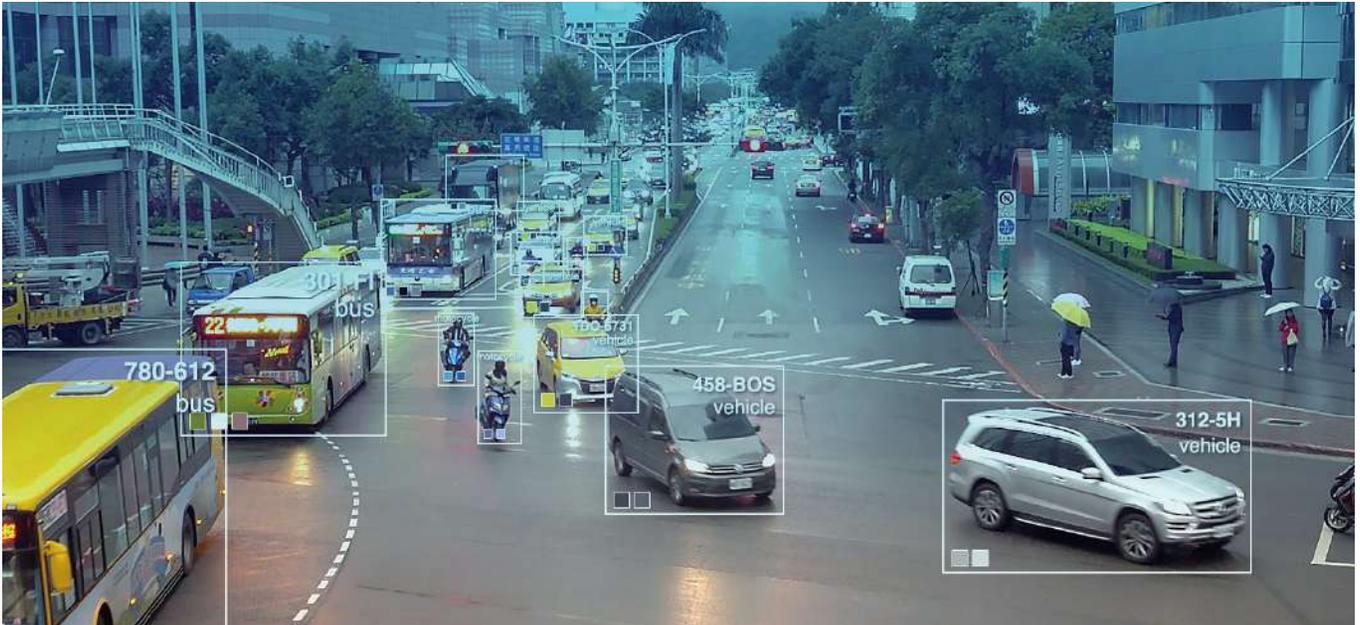

- Gender
- Age
- Eyewear
- Mask

Behavior Analytics

- Intrusion Detection
- Line Crossing
- Direction Detection
- Direction Violation
- Intelligent Behavior Analysis
- Loitering Detection
- People Counting (Zone and Line Crossing)
- Fall Detection (Depth Camera)
- Occupancy Estimation (Depth Camera)

IVAR® Analytic Capabilities

Vehicle & License Plate Recognition

- Vehicle Type Detection
- Vehicle Counting
- Vehicle Zone Intrusion
- Vehicle Path Analysis
- Vehicle Direction Violation
- Taiwan LPR
- Japan LPR

Pandemic Response Solutions

- Mask Detection
- People Flow Management
- Crowd Detection

IVAR® Analytic Capabilities

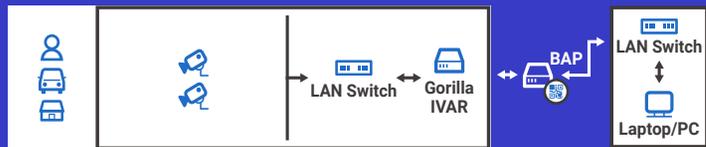

IVAR® performs smoothly with Intel technologies on different edge devices and scenarios. Scale software before hardware.

* Contact Gorilla for higher camera solutions

Edge

Stand-alone device locations
E.g. POS systems, ATMs, Kiosks, etc.

- CPU** Intel Core i3 12100
- RAM** 32GB DDR4-2133MHz
- HDD1** 256GB SSD
- HDD2** 500GB SATA (7,200RPM) or higher volume for video/event storage
- OS** Windows 10 (64-bits), Windows 11 (64-bits), Windows server 2016/2019, Ubuntu 18.04 LTS (only for volume customers)

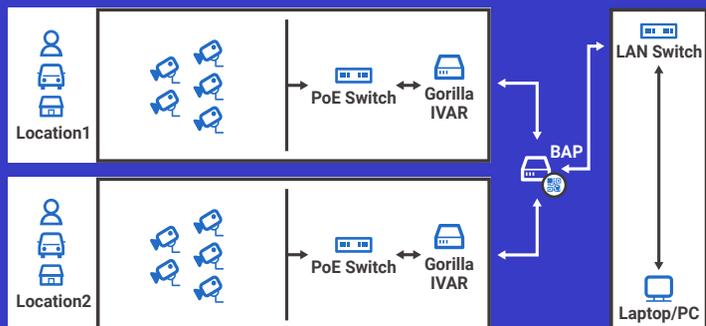

2 CH Recording, 2 CH IVA

Gateway

Multiple dispersed locations
E.g. Retail, Toll crossings, etc.

- CPU** Intel Core i5 12600
- RAM** 32GB DDR4-2133MHz
- HDD1** 256GB SSD
- HDD2** 2TB SATA (7,200RPM) or higher volume for video/event storage
- OS** Windows 10 (64-bits), Windows 11 (64-bits), Windows server 2016/2019, Ubuntu 18.04 LTS (only for volume customers)

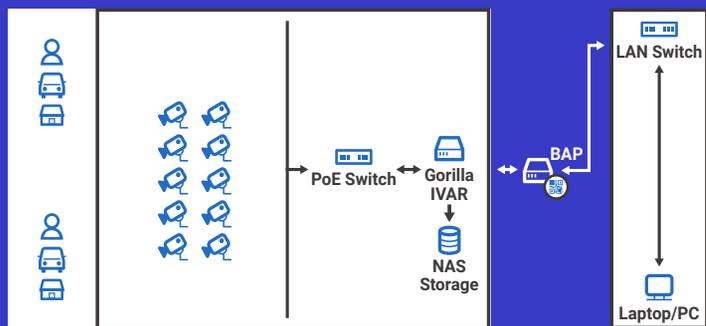

5 CH Recording, 5 CH IVA

Server

Large single locations
E.g. Hospitals, Airports, etc.

- CPU** Intel Core i7 12700
- RAM** 32GB DDR4-2133MHz
- HDD1** 256GB SSD
- HDD2** 4TB SATA (7,200RPM) or higher volume for video/event storage
- OS** Windows 10 (64-bits), Windows 11 (64-bits), Windows server 2016/2019, Ubuntu 18.04 LTS (only for volume customers)

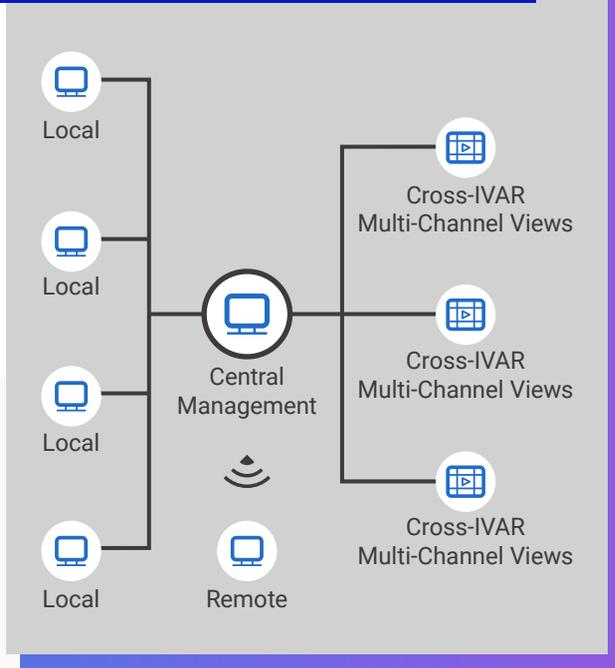

10 CH Recording, 10 CH IVA

Supports

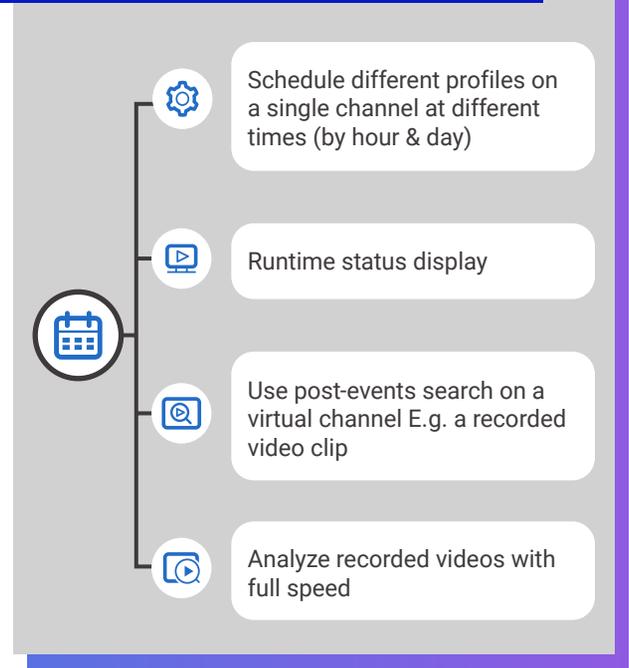

CCTV & IP-based cameras RTSP, ONVIF Profile S, & PTZ compatible H.264 transcoding.

IVAR® Intelligent Architecture

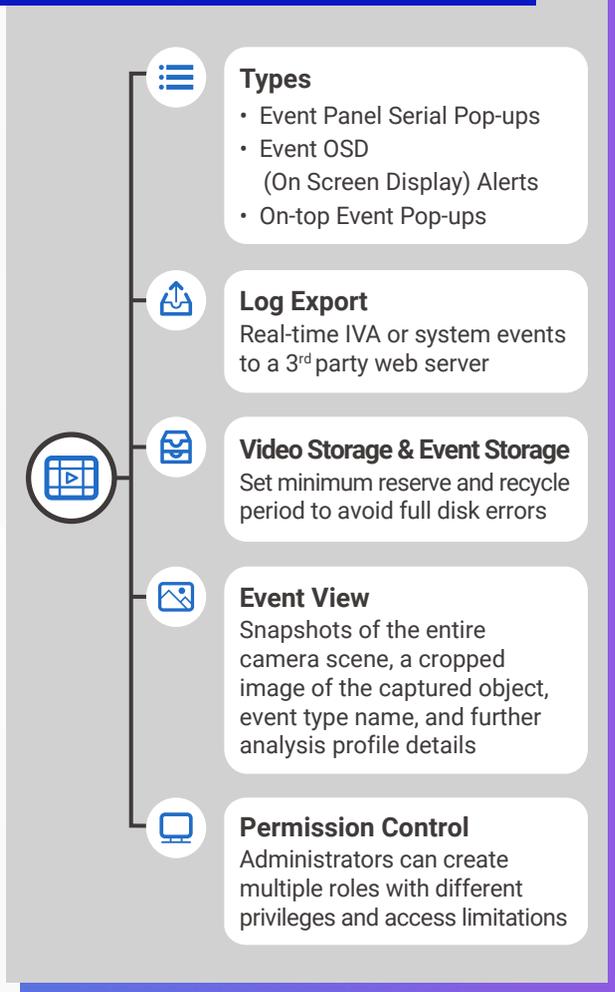

Systems Monitoring and Control

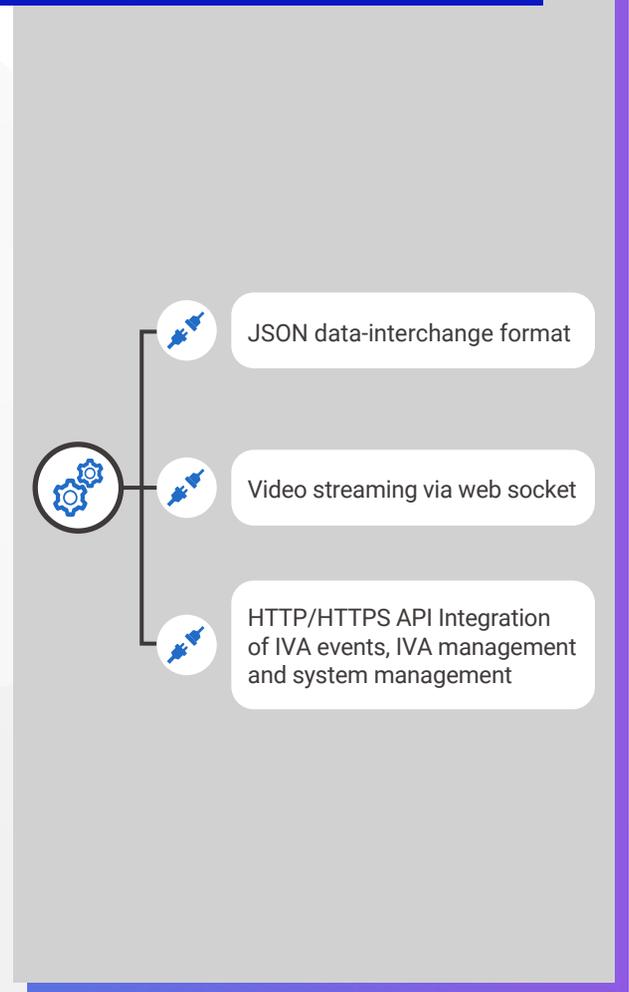

IVA Profile Scheduling

Event Management

API Integration

Companion Software Modules

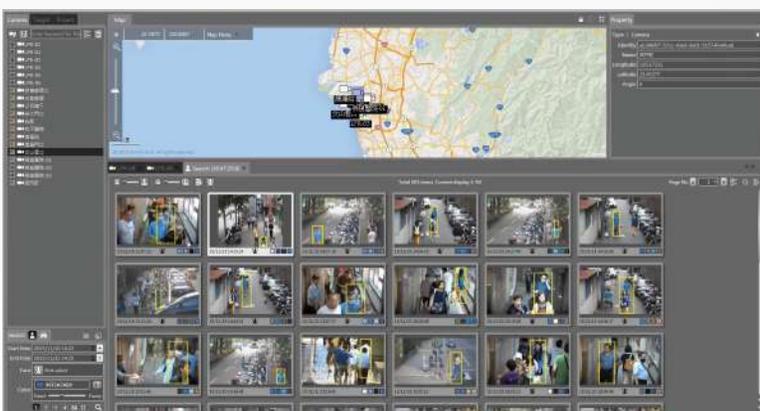

BAP (Biometric Authentication Provider)

Gorilla BAP is a back-end system giving support to Gorilla IVAR®, Smart Attendance, or 3rd party applications which require facial recognition technology. It establishes and manages the face profile database, verifies face images captured by IVAR® and Smart Attendance to confirm the identity of people's faces. BAP has a face profile validation mechanism to improve the quality of face profiles to ensure the identity is correctly vouched. BAP creates an unlimited number of groups to manage face profile data to support watch lists and alerts in IVAR®. BAP's integration into IVAR® and Smart Attendance greatly increases face checks without affecting system performance.

Customizable Solutions

Add greater value to the capabilities of your system by incorporating these digital transformation solutions from Gorilla.

FVS (Fast Video Search)

Quickly and easily search archived video for past events to locate detailed information on people and more.

Network Security Products

- **EdgeGuard** - front-line threat detection for OT Security
- **NetProbe** - prevent network intrusions by learning attack patterns
- **NetTrap** - isolate and contain attacks before they reach your network
- **HMD** - supreme endpoint protection
- **FR-MOTP** - facial recognition with a dynamic mobile password protection
- **SCP** - a security convergence platform to monitor total network
