

GORILLA TECHNOLOGY

NEUTRADC BATAM

AI Compute Deployment

US\$2.5bn Total Contracted Value | 1,875 Servers

Five-year contracted AI infrastructure program at NeutraDC Batam with phased readiness, deployment and revenue ramp.

Investor Presentation | V0.1

Commercial Anchor Signed with NeutraDC Batam

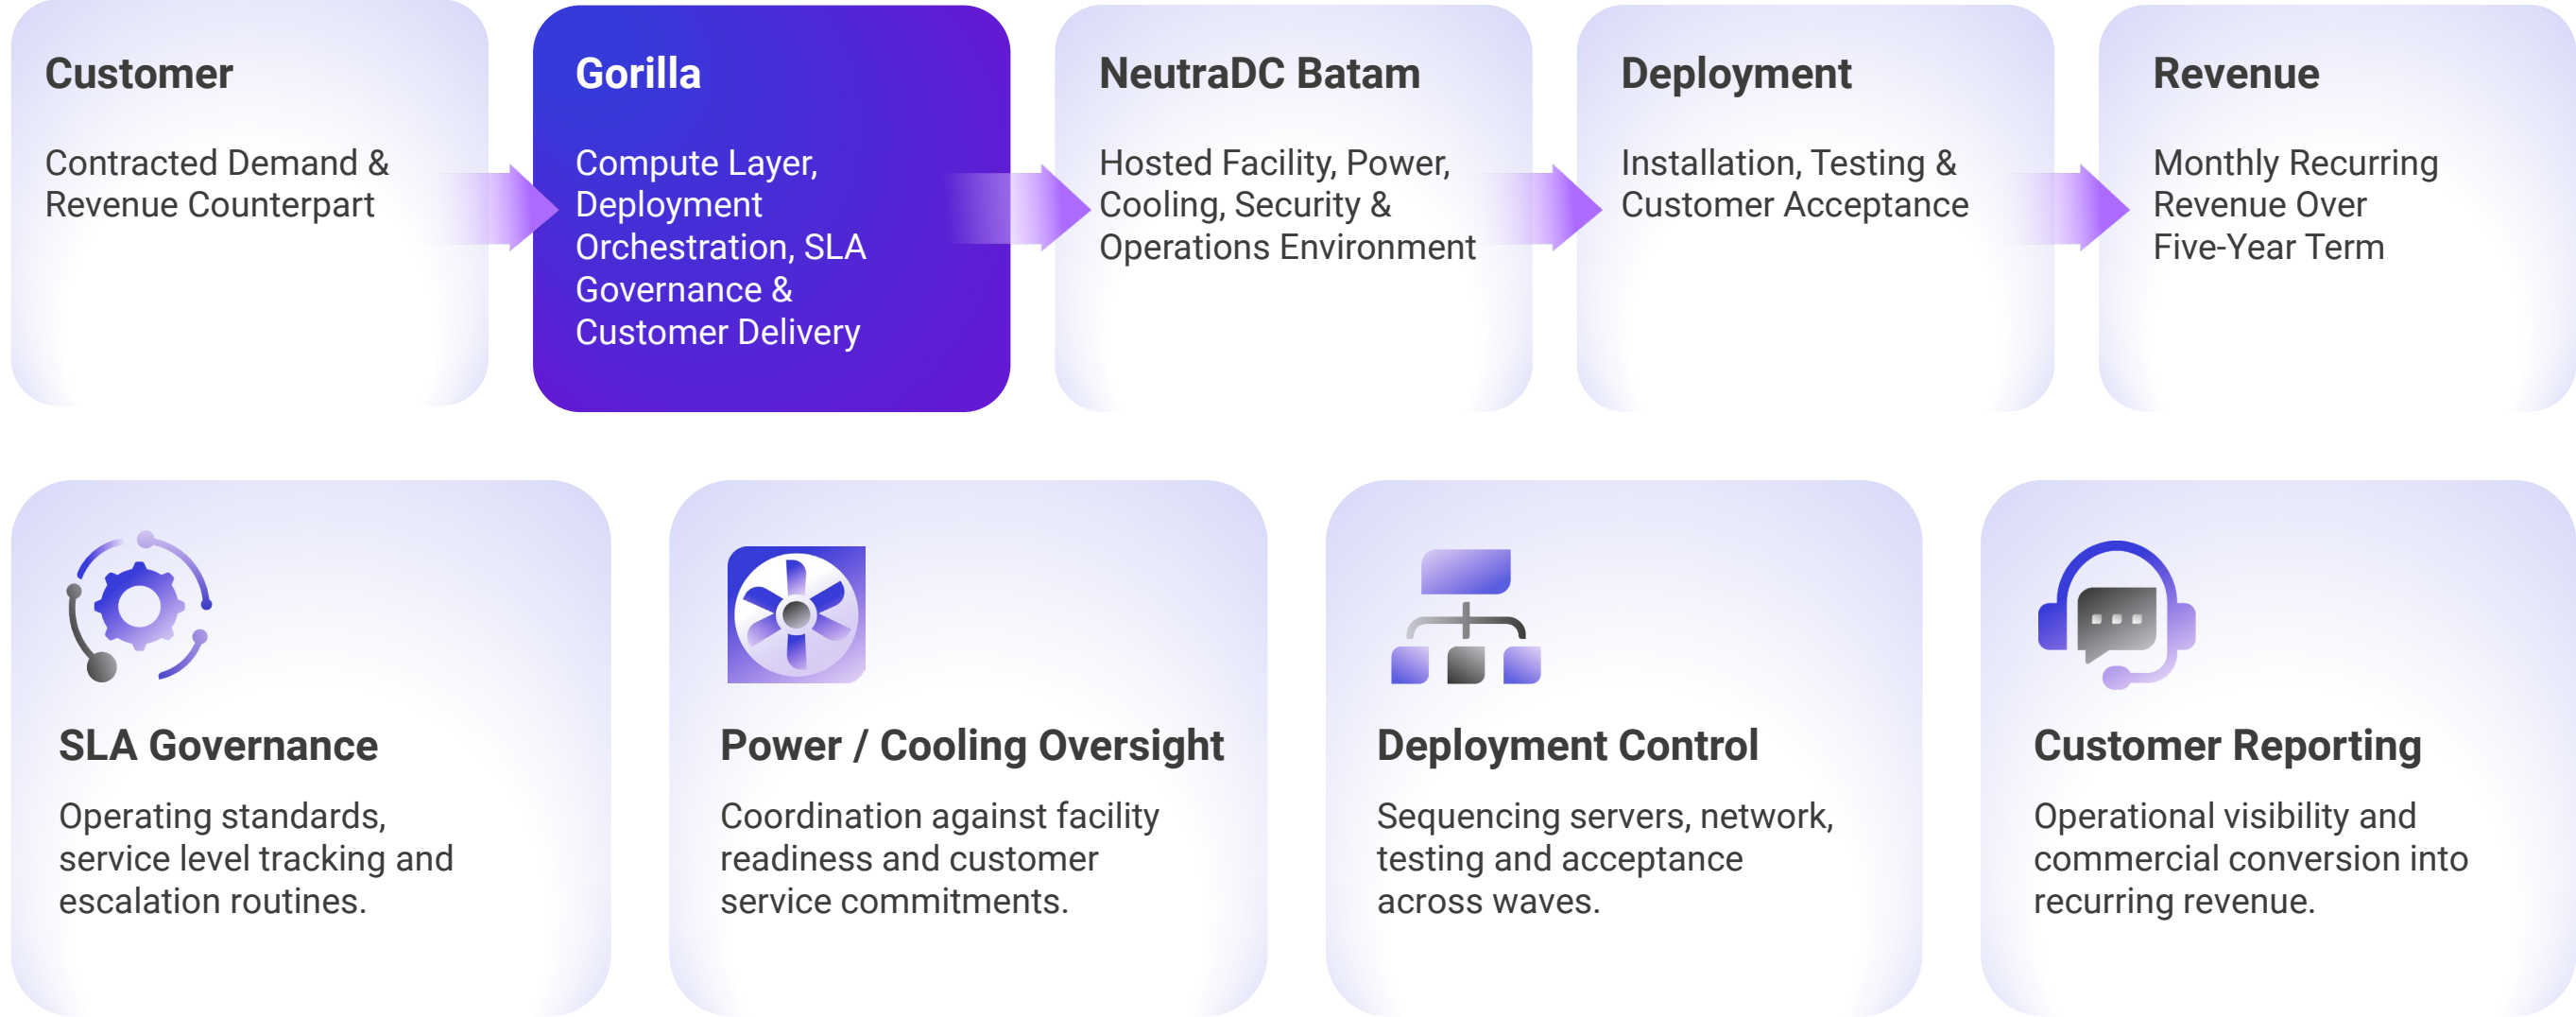

Signed Anchor Deployment

The program has transitioned from commercial agreement to deployment. The signed agreement establishes the framework for Gorilla to deliver an AI compute platform for the customer at NeutraDC Batam.

Gorilla's Role

Operating Layer Between Customer & the Facility

Gorilla Delivery Model

The customer's capacity is hosted at NeutraDC Batam. Gorilla manages the customer-facing AI compute layer including deployment coordination, SLA governance, power/cooling oversight, operational reporting and revenue conversion.

Readiness & Deployment Ramp

300→1,000→1,875 Servers

Revenue recognition ramps with facility readiness, installation testing & customer acceptance.

Facility Readiness

Visible Progress Across Internal & External Works

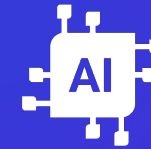

Batam

Regional Digital Corridor with AI-Ready Infrastructure

Connectivity

A carrier-neutral ecosystem. Batam is positioned near major cable landing stations and links Indonesia, Singapore, Malaysia and Thailand.

AI-Ready Design

High-density racks with liquid-cooling capability and efficient infrastructure for demanding AI workloads.

Power & Water

Stable PLN Batam power supply and industrial estate water resources support data center operations.

Certifications

LEED Gold, ISO 27001, ISO 14001, ISO 45001, PCI-DSS, UTI Tier III and TIA-942 listed by NeutraDC Batam.

*Public facility attributes are summarized from NeutraDC Batam website.

*Commercial commitments remain governed by the final signed project documents and service orders.

Investor Message

Contracted Capacity Moving into Execution

Commercial Anchor

The customer's demand supports a five-year contracted deployment.

Revenue Scale

c.US\$2.5bn total contracted value, with c.US\$1.3bn from the first 1,000 servers.

Execution Pathway

Three readiness and deployment waves: 300 servers, 1,000 cumulative servers then 1,875 cumulative servers.

Operating Control

Gorilla manages compute delivery, SLA governance, customer reporting and revenue conversion.

NEAR-TERM MILESTONES

- End of Sep 2026 - Initial Deployment
- Dec 2026 - Phase 1 Completion
- Q2 2027 - Full Deployment Readiness
